Mission Statement

The Intervention and Referral Services (I&RS) Team is a building based team comprised of administrative and instructional school staff and parents committed to supporting students who are at risk in the general education population. The I&RS Team assists school staff by providing strategies and interventions to resolve an array of academic and behavioral problems in the general education setting. The I&RS Team process provides students with an opportunity to be successful in the overall school environment.

The I&RS Team process is not an automatic precursor to a Child Study Team evaluation. It represents a separate and distinct team effort to provide help via classroom activities. However, some students may be referred to the Child Study Team for an evaluation after an I&RS team intervention is unsuccessful.

Intervention and Referral Services Procedures

In September the I&RS Team is to announce the dates and times of the I&RS meetings for the year. There are to be two meetings per month. September meetings should be used to discuss cases carried over from the year prior. Action plans from the previous year should be distributed to current year teachers. The entire I&RS process is tracked through the Hibstervention Software System. All forms are electronically stored, viewed and signed off on within this system.

Step 1: The referring person (teacher, family, or staff member) must create a pre-referral and manage best practices and interventions for a minimum of three weeks prior to referring to I&RS. Three weeks is best practice but not mandatory for all cases. The pre-referral and the pre-referral form must be completed in its entirety prior to the referral being accepted.

Step 2: The I&RS Team will review the pre-referral and decide whether or not the case will be accepted. Parental contact will be made to inform parents of the meeting date. The following data will be gathered to discuss at the meeting-- report cards, standardized test data, attendance information, discipline data, social-emotional referrals, prior referrals and teacher observation forms. The nurse must complete it and then upload it back into the Document tab. All data should be in Hibstervention or uploaded into the Document tab of Hibstervention. Paper folders will no longer be kept.

Step 3: Develop the formal action plan at the I&RS meeting. The I&RS Team, in conjunction with the family and the teacher(s), develops an action plan to assist the student and the teacher. The action plan should be completed at the meeting and is a tool to assist teachers in assisting the student. The action plan should consist of strategies for the teacher to use in the classroom but can also include outside assistance. Each action plan should include a multitude of interventions/best practices and be assigned to all teachers the student sees including elective teachers. Each individual intervention should be assigned to the teacher who is required to rate the effectiveness of it. Be sure to complete frequency and duration of each.

An I&RS team member is assigned to be the case manager, to monitor the plan and strategies that will be implemented. The School Counselor can also serve as a case manager. The School Counselor determines a follow-up meeting date/time to review the action plan. Cases should be reviewed between forty and ninety days. It is best practice to set up a rotating schedule to ensure students are actively reviewed multiple times a year. Meeting minutes are to be recorded at each meeting in the Case Notes tab of Hibstervention.

Step 4: Once the I&RS team create the action plan it should be shared with all teachers and parents of the student. The case manager is to ensure all staff signatures are obtained via Staff Signature tab in Hibstervention.

Step 5: *Support, Evaluate and Continue the Process:* Teachers must rate the effectiveness of the interventions/best practices in the action plan every two weeks via Hibstervention.

Student work samples should be collected multiple times a year and stored in the Documents tab of Hibstervention. All teachers must complete a Hibstervention Observation prior to each meeting.

Step 6: The School Counselor notifies the teacher(s) and all individuals with plan of the follow-up meeting date and time. The School Counselor notifies the family of a follow-up meeting with the appropriate date and time to the student's home. The I&RS Team, family, teacher(s) and individuals with responsibilities for the action plan, meet and review the student's progress at another IR&S meeting within forty to ninety days. If the student is successful with implemented interventions in the regular education classroom, the team will discontinue I&RS. Follow up becomes the responsibility of the School Counselor.

Step 7: The I&RS Team continues to meet at regular intervals to monitor progress and/or to amend the action plan. All stakeholders are notified of the meeting dates/times via Hibstervention. If the student is **not** successful with the implemented interventions in the regular education classroom, after an extended period of time, the I&RS Team or the parent decides whether referral to the Child Study Team is warranted. However, additional interventions may be implemented first. A referral to the Child Study Team can be submitted electronically via Hibstervention.

Participants in the I&RS Process

The school's Intervention & Referral Services (I&RS) Team is an ancillary student support service with the goal of assisting school staff and parents to address the spectrum of students learning, behavior and health problems encountered in the general education program. The emphasis is on early identification and intervention to counter problems at the classroom and school level.

The structure of the I&RS Team should be a collaborative team approach featuring structured and collegial planning, decision making and problem solving for general education students. Parents are to be actively involved in the process but parental permission is not required.

The intent of the I&RS Team is to address the full range of issues, academic, behavior and health, that may interfere with a student's ability to learn and adjust properly in a school environment. Students whom are referred to occupational therapy, BSI and end of year retention should be reviewed and monitored by the I&RS Team.
